

data centre brochure

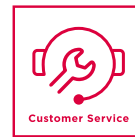

a partnership that goes beyond installation

When you work with Aalberts, you gain more than just products. You gain a collaborative partner with global expertise and a deep understanding of data centre operations. With decades of expertise in integrated piping systems and hydronic flow control, we provide tailored systems that meet the unique challenges of today's hyperscale and colocation facilities.

how can we support you with your projects?

- concept & design assistance (including Revit/BIM support)
- local standard and regulation compliance
- Factory Acceptance Testing (FAT)
- commissioning guidance and technical training
- post-installation service contracts

uptime & reliability

Aalberts IPS ensures uninterrupted operations with our mission critical technologies, testing programs, technical support and our service availability.

sustainability

Our solutions are built to last, to aid reduced energy consumption and to enhance system longevity, this contributes to key parts of climate-neutral commitments.

key site elements

Our solutions are space and time efficient. We customise our solutions to your needs and your building space for optimal performance.

energy efficiency

Our cooling and HVAC systems reduce energy consumption via optimised pressure maintenance, balance systems, air and dirt removal, and efficient flow.

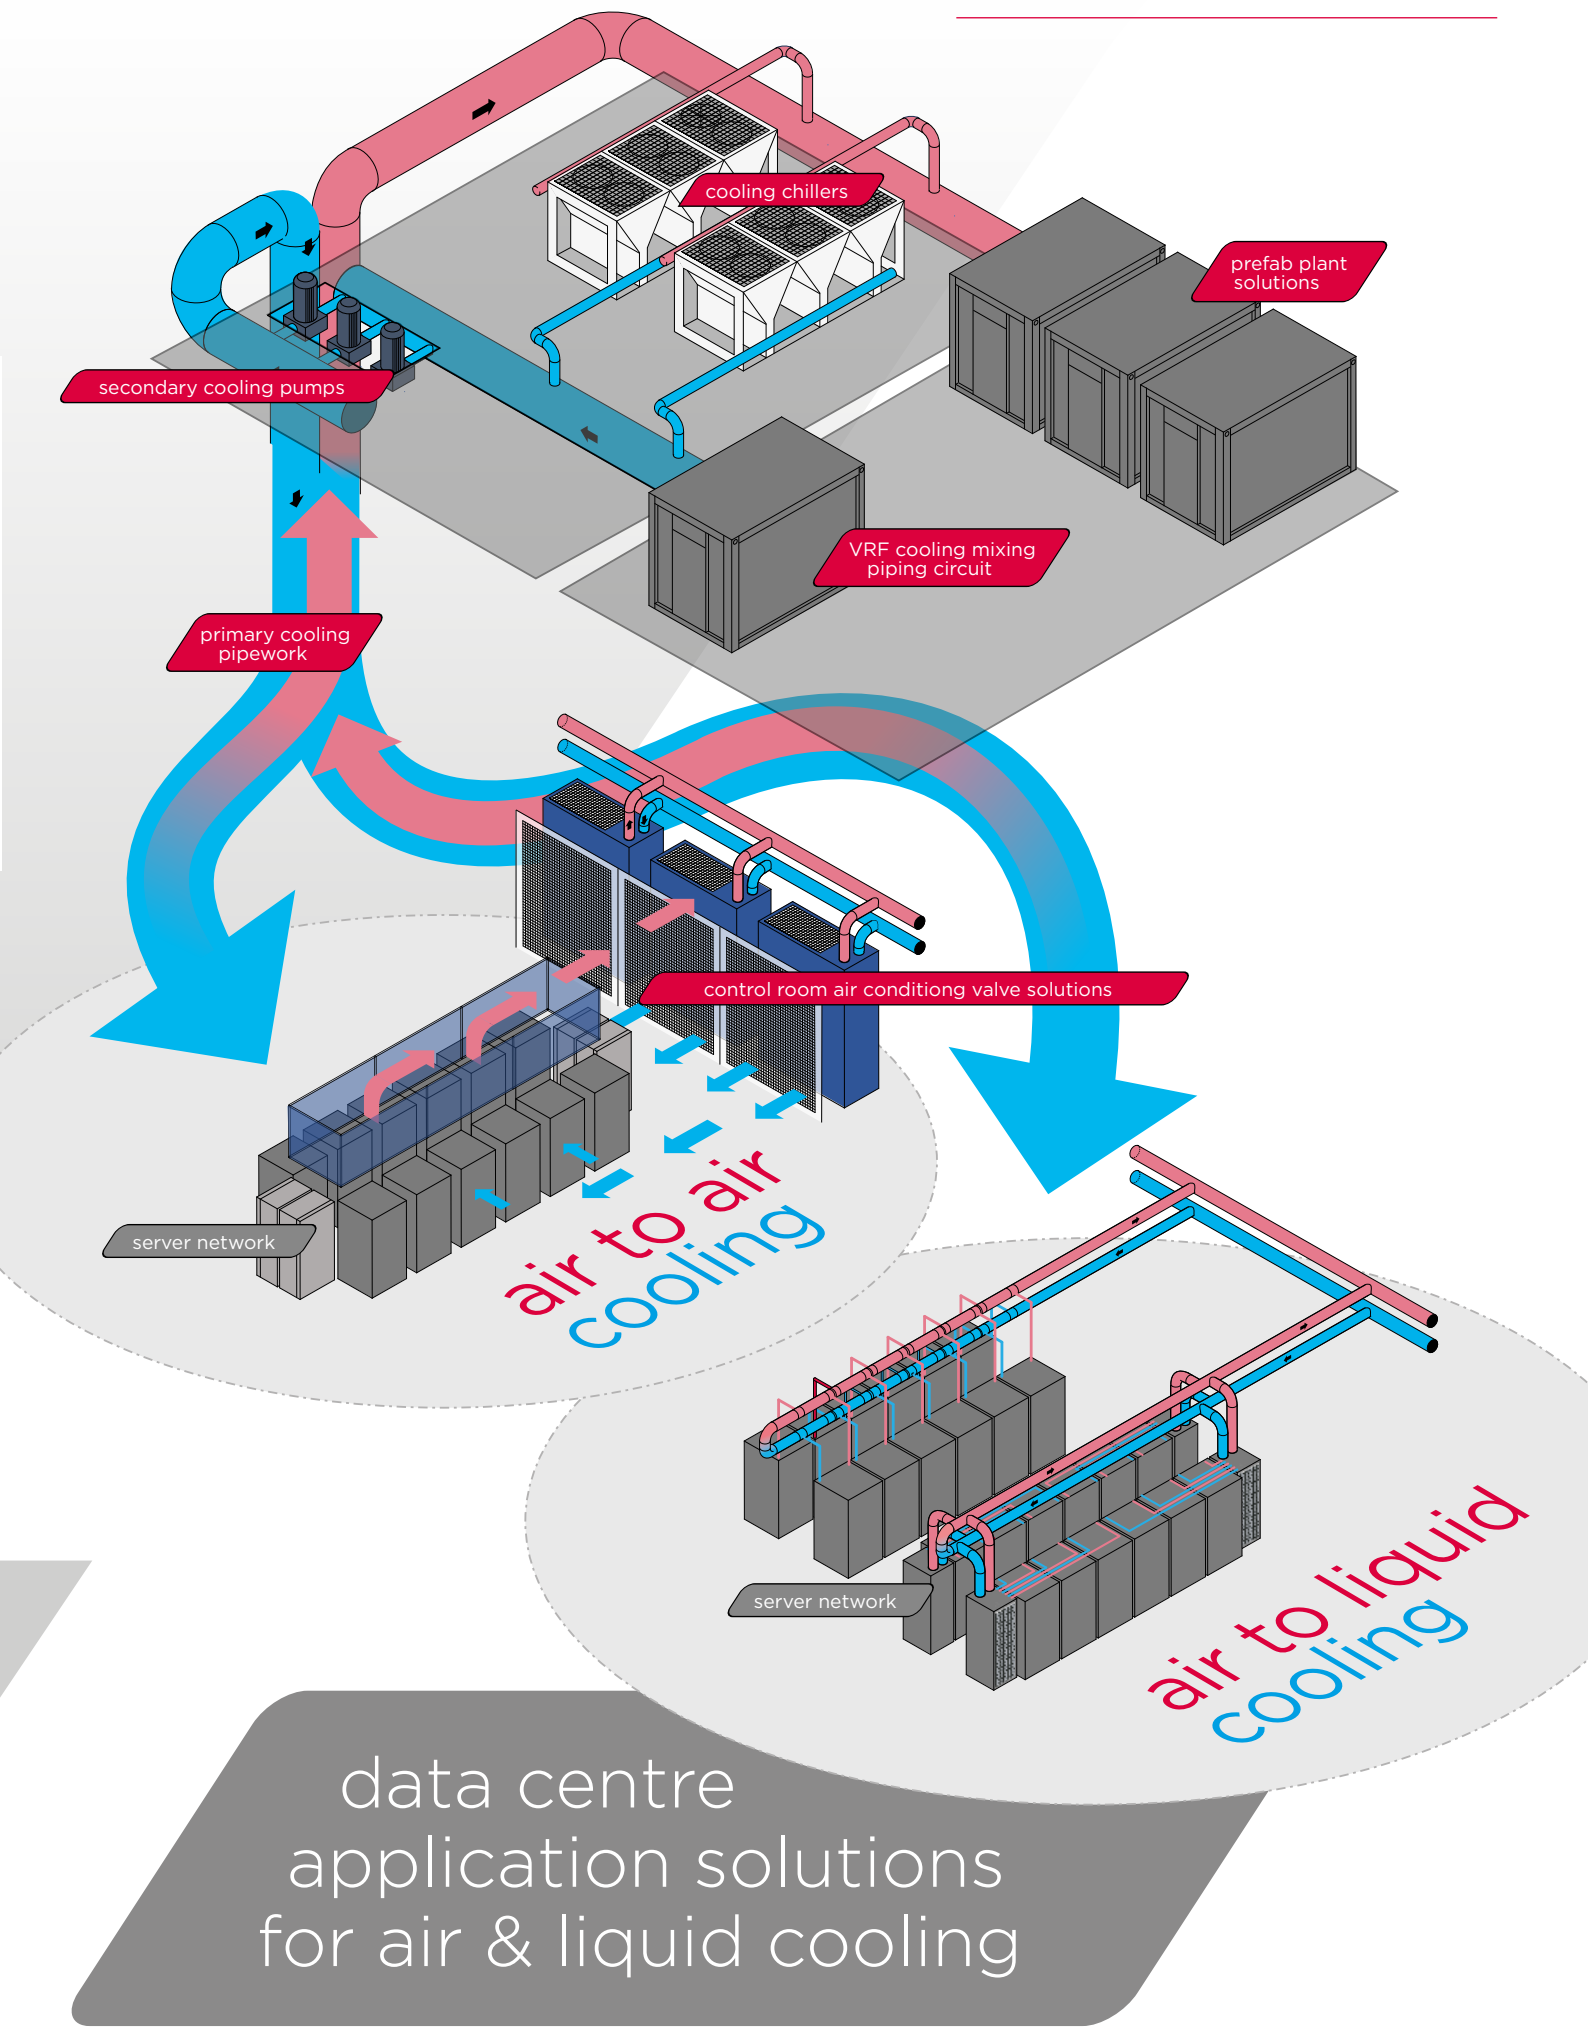

reuse of heat

Our skidded solutions combine heat exchangers and pressure control technology to deliver efficient, quality and reliable flow through piping systems.

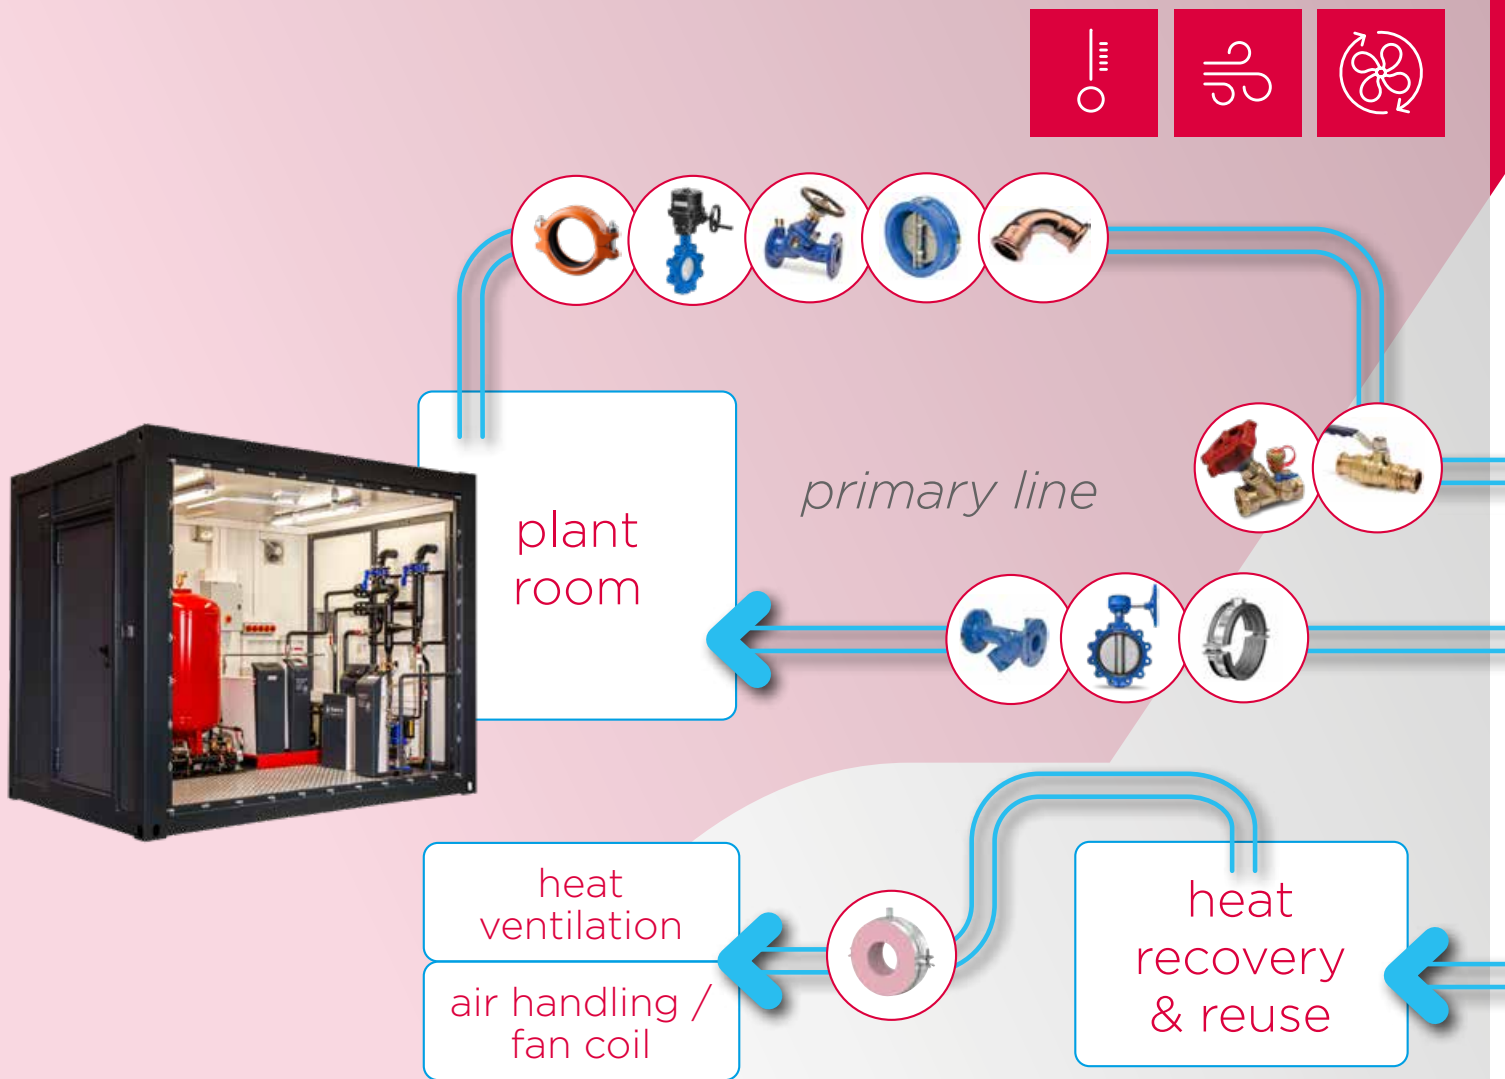

human capital / supply chain

Aalberts IPS solutions provide reduced installation time, efficient delivery, prefabrication and one-stop engineering. We are your time saving solution in a time of personnel shortage.

Aalberts ips data centre solutions tailored to you

client

- we are a mechanical parts solution for HVAC & cooling applications
- experts & trusted partners for your global projects
- commentary design services
- product assurance
- flow & temperature optimisation for efficiency to reduce operational cost
- fast jointing solutions to support challenging timescales
- local regulation & standard compliance
- sustainability certifications
- technical & after sales support
- product development problem solving

installer

- we provide a multifaceted offering under one partner
- technical support & supply chain reliability
- project tracking
- simplified product designs for easy installation & maintenance
- product assurance
- full bore direction: higher flushing velocity on critical parts
- de-risking commissioning stages
- installation guidance & training
- technical & after sales support
- authentic products

We operate from various regions around the globe: America, EMEA and APAC. As we have multiple locations in many countries, we are always close to our customers. More than 3500 mission critical employees are persistent to offer the best integrated piping system.
